## **DETAILED ACTION**

### **REASONS FOR ALLOWANCE**

1. This is an Examiner's statement of reasons for allowance. The closest prior art Rodrigues et al (U.S. Pat. No. 6,408,403) discloses a computer operable for integrating and automating test procedures within a computer application program. The test operation objects are instantiated by calls to functions in a test operation runtime. However, Rodrigues singularly or in combination fails to anticipate or render obvious the recited feature:

As per claims 30 and 40 "emulating a user using the load testing scripts, the load testing scripts being produced by generating a load testing script from the captured application calls according to the timing information of the captured calls, such that the user is emulated".
